DETAILED ACTION

Election/Restrictions

Applicant's election of Species I, claims 1-6, in the reply filed on July 25, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Replace the present title with: --Stacked Semiconductor Transistors--.

This application is in condition for allowance except for the presence of claims 7-9 to an invention non-elected without traverse. Accordingly, claims 7-9 have been cancelled.

REASONS for ALLOWANCE

The following is an examiner's statement of reasons for allowance:

A close prior art, U.S. Patent No. 5,793,115 to Zavracky et al., discloses most of the limitations of the claims, but fails to show at least a second electrode formed in a back surface

Art Unit: 2815

side of the first substrate and a forth electrode formed in a back surface side of the second substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Wenzel et al. (illustrates two chips connected together), Walker et al. (illustrates two transistors connected together in FIG. 11) and Japanese Patent Application No. 59-107554 (illustrates plural SiC with Si layer laminated together).
